

**Amendments to the Claims:**

Please amend claims 1, 9, 17 and 21 as follows. Please cancel claims 2, 10 and 18.  
This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) An apparatus that moves a jumping element,  
comprising:  
  
a housing;  
  
a motor attached to said housing;  
  
a hub coupled to said motor and adapted to be coupled to the jumping element; and,  
  
an audible indicator coupled to said motor to provide an indication of a motor  
characteristic.
2. (Cancelled)
3. (Original) The apparatus of claim 1, wherein said indicator includes a  
speaker.
4. (Original) The apparatus of claim 1, wherein said motor characteristic is a  
speed of said motor.
5. (Original) The apparatus of claim 1, further comprising a crank arm that is  
coupled to said hub and the jumping element.

6. (Original) The apparatus of claim 5, wherein said hub includes a spring that exerts a force onto said crank arm.

7. (Original) The apparatus of claim 1, wherein said hub rotates the jumping element about a horizontal axis.

8. (Original) The apparatus of claim 1, wherein said hub rotates the jumping element about a vertical axis.

9. (Currently Amended) An apparatus that moves a jumping element, comprising:

a housing;

a motor attached to said housing;

a hub coupled to said motor and adapted to be coupled to the jumping element; and,

audible indicator means for indicating a motor characteristic of said motor.

10. (Cancelled)

11. (Original) The apparatus of claim 9, wherein said indicator means includes a speaker.

12. (Original) The apparatus of claim 9, wherein said motor characteristic is a speed of said motor.

13. (Original) The apparatus of claim 9, further comprising a crank arm that is coupled to said hub and the jumping element.

14. (Original) The apparatus of claim 13, wherein said hub includes a spring that exerts a force onto said crank arm.

15. (Original) The apparatus of claim 9, wherein said hub rotates the jumping element about a horizontal axis.

16. (Original) The apparatus of claim 9, wherein said hub rotates the jumping element about a vertical axis.

17. (Currently Amended) A method for operating an apparatus that moves a jumping element, comprising:

activating an apparatus that includes a motor coupled to a jumping element;

changing a speed of the motor; and,

audibly indicating the change of motor speed.

18. (Cancelled)

19. (Original) The method of claim 17, wherein the jumping element is rotated about a horizontal axis.

20. (Original) The method of claim 17, wherein the jumping element is rotated about a vertical axis.

21. (Currently Amended) The method of claim 17, further comprising detaching the jumping element from a hub coupled to the motor.~~me~~
